

Paddling by the city center

Beaver safari in the river Dohnaforsån

Suitable canoe	Gussed expenditure of time	Distance to paddle	Difficulty level
Open canoe Kayak	1-2 hours	About 2,5 km	Easy/beginners

The tour is starting at Borgmästarholmen, the guestharbour or Husabergs Udde.

If starting from Borgmästarholmen you follow the bridge and then paddle along the beach towards the marina. Paddle between the island Klockarholmen and the marina and follow the jetties southwards. By "Vätterns Marina" you will find the outflow of the river Dohnaforsån.

Let this tour become a little adventure by paddling silently in the river which is first leading through the forest of a marsh, called Lindbomossen, and then is flowing along meadows and enclosures. Have your camera ready, you never know when the best motive is showing up!

In the inflows to the river you can find beaver lodges and the chances to see beavers are quite high when paddling on the evening.

Depending on how high the water is, you might reach different points along the river. Be aware of turning around as long as the river is wide enough. Sometimes cows are grazing in the enclosures. They are curious and might approach the river in order to see who is coming. However, there is a fence between the river and the animals.

Renting: You can rent a kayak on Borgmästarholmen and Husabergs Udde. You can rent an open canoe at Husabergs Udde and at the harbor.

Remember: take some extra clothes with you, which you store in a waterproof bag. Your mobile phone also needs to be stored waterproof. It is always great to have some snacks and something to drink with you.

Other boats: there are many boats trafficking the waters of Alsen, for example the excursion boat M/S Wettervik, motor- and sailing boats. Sitting in a canoe or kayak, you are quite invisible, especially against the light. Be careful and try to keep paddling close to the shore, where you even will benefit of the best views. If you need to cross a fairway, check out for other boats and let them pass before you continue. Priority to the right. Sailing boats always have priority.
